

FRANCISCO ALVAREZ RAINERI

FULL STACK DEVELOPER

JavaScript | Node | Next | React | Redux | Express | PostgreSQL | Firebase | MongoDB

ABOUT ME

After a decade of part-time and temporary jobs, I felt the need to settle down and follow the path of a professional career. Programming came as the obvious choice. The subject caught my attention back in high-school because problem solving is my modus operandi and writing comes as a natural way to achieve it. Having graduated from an +800hs intensive bootcamp, I'm eager to join a team and start adding value. Meanwhile, there are plenty of problems to work on and tools to learn.

PROJECTS

FORMIDABLE

Forms creation and management App

- We adapted an existing Node module into the specific needs of the client and built an App around it.
- I interpreted complex code, expanded upon its functionality and integrated it with a front-end.

FIGURITA REPETIDA

Football figurines E-commerce

- We developed an e-commerce from zero to MVP.
- I implemented back-end functionalities such as: a shopping cart, user management with roles and password protection, favorites, tags and e-mail confirmations.

THE MOVIE DATA BASE

Full Stack integrative exercise

- I developed an App where a logged-in user can navigate and manage the information provided by the API The Movie Database.
